

# Reliability Management Simplified

# TrakER

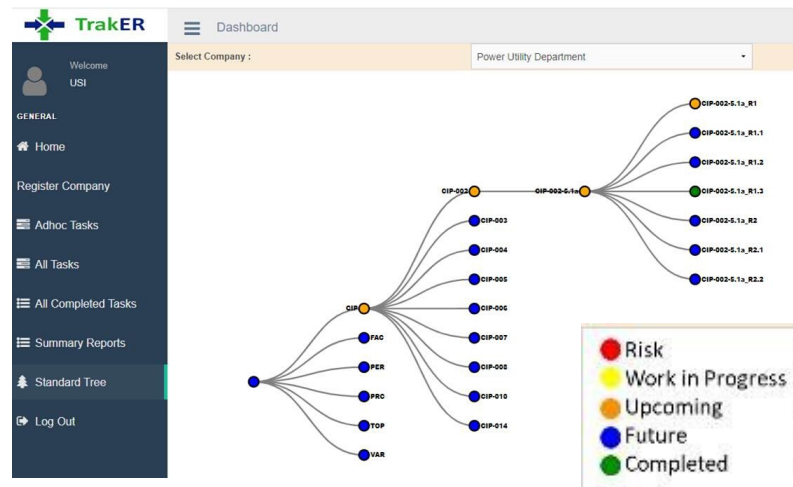

## What is TrakER?

TrakER is a new administrative tracking and monitoring software tool.

TrakER allows organizations to monitor, assign and track regulatory requirements.

## Why TrakER?

TrakER was crafted by compliance experts with NERC standards in mind.

## Features

**Central tracking tree-** This tree lays out all of your performance requirements and their current status

**Assigning task features-** Always know who on your team is responsible for which tasks.

**Status elevation and notification system-** The color coded notification system provides time sensitive and critical assessments.

**Email notification system-** Our system will automatically notify assigned team members of important deadlines.

**Summary reports-** Keep track of what you have done in the past and be informed while you plan your organizations future
